

Attachment A: List of AB 2588 Facilities in 2023, page 1

FAC ID	Facility Name	Facility Source Type	Prioritization Category
2	CalPortland Redding Cement Plant	Limestone Quarry; Shale Quarry; Mineral Processing Plant; Cement Plant	High
51	Burney Forest Products	Co-generation Biomass Power Plant	High
18	Sierra Pacific Industries - Burney Division	Co-generation Biomass Power Plant; Fungicide Spray	High
43	Shasta - Sustainable Resource Management	Biomass Power Plant; Log Chipping	High
139	City of Redding - Clear Creek WWTP	Wastewater Treatment Plant	High
634	Blair's Direct Cremation and Funeral Services	Crematory Retort	High
59	Fawndale Rock & Asphalt	Mineral Processing Plant; Asphalt Plant; Lime Slurry Plant	Intermediate
44	Dicalite Minerals Corporation	Diatomaceous Earth Processing Plant	Intermediate
39	Sierra Pacific Industries - Shasa Lake Division	Co-generation Biomass Power Plant; Fungicide Spray	Intermediate
107	Allen & Dahl - Palo Cedro	Crematory Retort	Intermediate
48	Sierra Pacific Industries - Anderson Division	Co-generation Biomass Power Plant; Fungicide Spray	Intermediate
158	Redding Memorial Park	Crematory Retort	Intermediate
103	Allen & Dahl - Redding	Crematory Retort	Intermediate
38	Aggregate Products	Mineral Processing Plant; Asphalt Plant; Lime Slurry Plant	Intermediate

FAC ID: The emission inventory ID number for each facility

PS: A Prioritization Score developed with the Emissions and Potency Procedure in the CAPCOA Facility Prioritization Guidelines.

HRA Results: Health Risk Assessment results are displayed as A/B/C where A = Cancer Risk per million, B = Chronic Hazard Index, and C = Acute Hazard Index. If these values are listed it means they were used to categorize the facility instead of the Prioritization Scores.

Prioritization Updated: This column shows the Reporting Year in which the facility's categorization was last changed.

USF: The Update Summary Form is the first document facilities due for quadrenial AB 2588 reporting must submit. The USF indicates if the facility has made any changes which may affect their emissions. If changes are found, then the facility may be required to submit an Update EI Plan followed by an Update EI Report.

Attachment A: List of AB 2588 Facilities in 2023, page 2

FAC ID	Prioritization Scores				Prioritization	
	Cancer PS	Chronic PS	Acute PS	HRA Results	Updated	Status
2	596.5	202.86	72.07		2021	Cancer PS > 10; Update EI Plan/Report approved; HRA under review
51	90.98	15.92	9.64		2021	Cancer PS > 10; HRA under review
18	89.9	3.68	2.01		2021	Cancer PS > 10; HRA under review
43	71.55 (32.39)*	5.75	1.18		2021	Cancer PS > 10; HRA under review
139	27.75	29.9	0.73		2021	Cancer PS > 10; HRA pending
634	17.09	2.69	2.32		2014	Cancer PS > 10; HRA under review
59				9.55/0.04/0.06	2014	
44				3.76/0.03/0.00	2008	
39				3.60/0.53/0.00	2011	USF under review; Prioritization Score pending
107	3.44	2.69	2.32		2021	
48				1.3/0.06/0.05	2022	Update EI Plan required; not yet submitted
158	1.18	16.17	7.98		2015	USF under review; Prioritization Score pending
103	37.04	10.75	9.28	1.18/0.05/0.147	2023	HRA Approved - Reprioritized to Intermediate; due for review in 2024
38	1.01	1.07	0.24		2013	

* The Cancer PS for this facility was evaluated with both the Emissions & Potency Procedure (Cancer PS = 71.55) and with the Dispersion Adjustment Procedure (Cancer PS = 32.29). Currently, all facilities are prioritized based on the Emissions & Potency Procedure. The Dispersion Adjustment Procedure was also checked at the facility's request. Both Cancer PSs indicate an HRA should be performed.
