APRIL - 1952

PARCELING SYSTEM ASSESSOR'S OFFICE

On motion of Supervisor Turner, seconded by Supervisor Chatham, resolution is passed by unanimous vote authorizing the Assessor to delineate parcels for the purpose of assessing same and number said parcels on maps, pursuant to the provisions of Section 327 of the Revenue and Taxation Code.

R E S O L U T I O N

BE IT RESOLVED that, when the county assessor possesses a complete and accurate map of any land situated within the county, the assessor may delineate parcels thereon for the purpose of assessing the same, as provided in Section 327 of the Revenue and Taxation Code, and shall number said parcels on said map in the manner hereinafter specified.

The complete and accurate map is deemed to be the assessor's master maps, which together with index maps, show areas of property within the county in sufficient detail to clearly identify them as to size, shape, and location with official survey maps or known survey points. The complete and accurate map herein referred to is deemed to be not only the master maps together with index maps now in the possession of the assessor but also all hereinafter coming into his possession until he has a complete and accurate map of all land within the county. Such master detail maps are to be arranged in numbered books with the maps numbered numerically starting with No. 1 in each book. (Said map consisting of the master detail maps and indexes and index maps should conform to the coordinated map system suggested in the Standard Committee Report No. 6.)

BE IT FURTHER RESOLVED that when such complete and accurate map has been parcelled and numbered as herein indicated, such map shall be known as the "Assessors Map" and such map or a copy thereof shall at all times be publicly displayed in the office of the assessor, and thereafter land may be described by reference to such map.

BE IT FURTHER RESOLVED that the assessor shall delineate and assign parcel numbers to each parcel in the manner hereinafter indicated on said map for purposes of assessment in accordance with law as to use and ownership and as to the revenue districts and taxing agencies in which the property is situated.

Even though a tract of land is in one ownership parcels of land shall not contain more than 640 acres except where a single section of land sectionized by the United States Government contains more than 640 acres. Where a tract of sectionized land contains more than 640 acres, it shall be delineated into parcels and assigned parcel numbers coextensive with sections and fraction of sections in said tract.

*amended by  
Res. 95-134  
7/21/52*

## A. THE PARCEL NUMBER

The parcel number shall consist of three parts as follows:

- (1) The number of the map book of the assessor's master maps of the county in which the particular master map showing the property is located.
- (2) The first two digits of the second part of the number shall represent the page number of this master map in the respective map book. The number "0" shall be used in front of map pages 1 to 9 of each book. The third digit of the second part shall represent the block number on the respective map page when the area is divided into blocks. When there is only one block to a map page the second number shall be the map page number as well as the block number but shall not exceed three digits.
- (3) The third part of the number shall be the number of the parcel on the map page if not in a numbered block and if in a numbered block the number of the particular parcel within the block. In describing parcels on a map page that is not subdivided into blocks, a parcel would be described, for example, as "3-36-9", blocks, which would mean Book 3 of Assessor's Maps, Map Page 36, and Parcel 9 on that map. If the parcel is on a map page subdivided into blocks, the description would be, for example, "3-363-5" which would mean Book 3 of Assessor's Maps, Block 363 (Map Page 36, Block 3) and Parcel 5 within that block.

## B. ORIGINAL NUMBERING

The original numbering of the parcels shall be done in the following manner:

(2) The block numbers shall be developed by assigning No. 1 to the upper left hand block on each master map and the other block numbers assigned consecutively downward by column from left to the right. The block numbers should begin with No. 1 on each master map.

(3) In numbering the individual parcels on each master map that is not divided into blocks the numbering should be generally from left to right beginning at the upper left hand corner. If there are several distinctive areas on a map, those areas may be numbered consecutively if in the judgment of the assessor that is the most practicable. Individual parcels within each block shall begin with No. 1 and shall be numbered consecutively as follows: (a) If a majority of the lots in any block face on streets running in a general northerly and southerly direction, the numbering shall start at the top left corner of the block and proceed down to the lower left hand corner of the block, then over to the upper right corner of the block and down to the lower right corner of the block. (b) If a majority of the lots in any block face on streets running in a general easterly and westerly direction, the numbering shall start at the top left corner of the block and proceed across to the top right corner of the block, then back to the lower left corner of the block and proceed across to the lower right corner of the block.

(4) If the arrangement of blocks or lots is such that the above system is not applicable, the assessor shall number the parcels by the system most similar, in the judgment of the assessor, to the system set forth above.

#### C. DIVISIONS AND COMBINATIONS

The parcel number assigned to a particular parcel shall never be used to designate another parcel. In the event that a parcel is divided or combined with another parcel, a new parcel number or numbers next following the last used parcel number for that block or map page shall be assigned to the new parcel or parcels. Divisions and combinations of parcels need only be made each year for the preparation of the new assessment roll except that divisions shall be made immediately and new parcel numbers assigned when requested for the payment to current taxes on part of an assessment, as provided for by Chapter 3, Part 5, Division 1 of the Revenue and Taxation Code or the partial redemption of property, as provided for by Chapter 2, Part 7, Division 1 of the Revenue and Taxation Code.

The new parcel or parcels shall be so delineated on the map or block with colored ink or otherwise so that an inspection will readily disclose not only the new parcels but also the old parcels. When a parcel is first divided into two or more parcels, the division including the new parcel number shall be shown in red, a second division within a parcel shown in green and a third division shown in orange. The new parcel area shall be outlined in the respective color so that it is definitely and clearly indicated. When a parcel number is changed a single line of the color used in making the change may be drawn through the former parcel number or boundary. The parcel number and boundaries of any parcel which is no longer used for assessment purposes shall not be deleted, obliterated, or made illegible.

In the event that the combinations of divisions on any block of map are so numerous that it becomes difficult to show the old and new parcels, the assessor shall prepare a new map page for that particular area and place it in the Map Book Volume immediately preceding the old map page, and delineate thereon the existing parcels. Appropriate notation shall be made on both the old and new map page referring one to the other and indicating the date the new map page was inserted.

The master maps must be kept and maintained in such manner and in such condition that a person of ordinary intelligence can determine therefrom at any time the location of any parcel of land assessed by reference to said map in the then current fiscal year or in any prior year.

#### D. NOTICE TO TAX COLLECTOR AND REDEMPTION OFFICER

When parcels that are delinquent are divided or combined the assessor shall notify the Tax Collector and Redemption Officer of such division or combination.

On motion of Supervisor Chatham, seconded by Supervisor Meeker, resolution is adopted as follows:

WHEREAS, the avoidance of taxation of Federally-owned real property has lead to a serious impairment of the local general property tax base in many localities; and

DECEMBER - 1952

WHEREAS, such a condition is prevalent in several areas in the State of California, and is particularly serious in the County of Shasta because 34% of the assessable area of the County is government owned, with an added 19% tax burden placed on the County of Shasta taxpayers; and

WHEREAS, the inequities developing through continuing removal from the local tax rolls of property acquired by the Federal government have heretofore been acknowledged in that corrective legislation has, from time to time, been introduced in Congress; and

WHEREAS, the Federal Bureau of the Budget did recently prepare an analysis of the extent of the tax avoidance of Federally-owned property; and

WHEREAS, there was introduced by Senator Richard Nixon in the Congress of the United States on May 22, 1951, Senate Bill 1519, based on the Budget Bureau's analysis, which, if amended to provide that its provisions for contributions in lieu of taxes should be applicable to properties acquired by the Federal Government in 1939 and thereafter, would materially correct the present burdensome and iniquitable conditions found in this county and other areas throughout the United States; and

WHEREAS, the Board of Supervisors of the County of Shasta, State of California, believes continuation of the present tax avoidance to be contrary to good governmental administration and to sound public policy, both locally and nationally: NOW THEREFORE

IT IS RESOLVED THAT the Congress of the United States, and particularly the California delegation, is requested to take appropriate and necessary action to obtain enactment into law of Senate Bill 1519, amended as suggested herein, during the forthcoming final session of the 82nd Congress.

IT IS FURTHER RESOLVED that this Board approve and concur with the resolution of the National Association of Assessing Officers, dated September 24, 1952, urging Congress to correct certain practices in connection with the drawing of contracts for the procurement of the implements of national defense, which practices lead to similar impairment of the local general property tax.
