

LOWER YOUR RISK OF OVERDOSE...

FENTANYL

TEST STRIPS SAVE LIVES

WHAT ARE FENTANYL TEST STRIPS

Fentanyl test strips are small strips of paper that can detect the presence of fentanyl in all different kinds of drugs (cocaine, methamphetamine, heroin, etc.) and drug forms (pills, powder, and injectables). **Remember that no test is 100% accurate and your drugs may still contain fentanyl even if you receive a negative result.**

WHY SHOULD YOU TEST

Fentanyl is a man made opioid that is up to 50 times stronger than heroin and 100 times stronger than morphine. It is a major cause of fatal and nonfatal overdoses in the U.S.

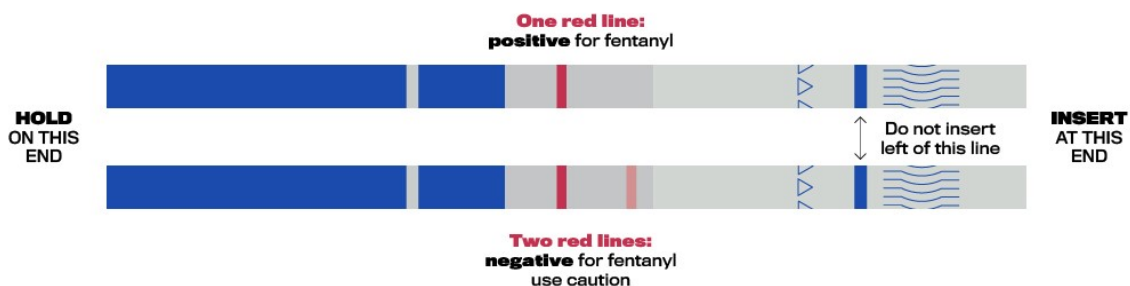

HOW TO USE FENTANYL TEST STRIPS

1. Add a tiny bit of powder/rock and a bit of water into a cooker or cap.
2. Dip white end of test strip in water.
3. Take test strip out of water and place it on a flat dry surface for 2-5 minutes.
4. Read results: 1 line = Positive
2 lines = Negative
No lines = Invalid test

POSITIVE

NEGATIVE
